Full Stack Software Developer

LANGUAGE EXPERIENCE

Back End:	Ruby on Rails	Classic ASP	C#	SQL	Postgres	Node.js
Front End:	JavaScript	React Native	Vue.js	Knockout	HAML	

WORK EXPERIENCE

Henri | Senior Full Stack Ruby on Rails Developer

SEPTEMBER 2018 – PRESENT / Phoenix, AZ

- Gather requirements, develop, test, and deploy new features based on market competitors and user needs to enhance the overall user experience, for example, introducing a marketplace feature in Henri.
- Assist in server scaling efforts on Heroku to accommodate an influx of users once the Beta became public with processes such as scheduled tasks, and caching.
- Work closely with the mobile development team to build a scalable and secure API.
- Advanced our test suite by encouraging test-driven development and better testing standards.
- **Ruby on Rails, Heroku, React Native, Vue.js, Postgres, and testing with RSpec.**

CIMCloud | Software Development Team Lead

MARCH 2018 – AUGUST 2018 / Greenville, SC

- Supervised a team of seven developers that set a 6-month record for utilization (billable hours) by creating a customized scrum for the team, improving workflow efficiency, and implementing individual work incentives.
- Improved customer satisfaction and retention through defining best practices, producing more accurate development quotes and publishing reliable code.
- Lead sales calls and meetings to help translate customer needs and build effective technical plans to obtain new customers.

CIMCloud | Software Developer

JUNE 2016 – MARCH 2018 / Greenville, SC

- Utilized various languages to introduce new features into hundreds of unique e-commerce websites.
- Heavily involved in the implementation and training in the company's switch to a modern JavaScript framework, Knockout.js, including installation and creating technical plans to convert customizations.
- Managed an auditing tool that monitored over 300 companies and their service agreements.
- Trained new employees, conducted interviews, and represented the company at events and job-fairs.
- Aligned the company for better success by documenting previously undocumented processes and features.
- **Knockout.js, C#, AWS, ASP, SQL.**

SysEDA | Software Developer – Internship

JANUARY 2015 – MAY 2016 / Columbia, SC

- Built a responsive website for virtual prototyping of naval ships and schematics.
- **JQuery, Knockout.js, Backbone, Bootstrap, and KendoUI** with a **C#** backend.

EDUCATION

University of South Carolina *Masters in Software Engineering (3.9 GPA) (2016)*

University of South Carolina *Bachelors in Computer Science, Minor in Mathematics (3.5 GPA) (2015)*
